3.To add the card to your home screen in Firefox for Android follow steps:

- Tap the menu button.
- From the menu button, tap page option and tap "Add to Home screen"

4.To add the card to your home screen on Windows Phone:

- Tap the More (..) button.
- Then tap "Pin to Start" in the drop down menu that appears

**eSana® PROGRAMS ARE NOT INSURANCE!**

The discount medical plans of eSana® offer a reduction in the cost of medical, dental, vision, pharmaceutical and chiropractic services. eSana® discount benefit programs are not insurance, nor are they an alternative to or substitution for insurance coverage. Since they are not health insurance, members must use eSana® providers and members are responsible for payment to the eSana® providers at point of service of discount healthcare fees incurred. If you currently have insurance, you should be aware that canceling that policy may make it difficult to later obtain coverage. eSana® recommends that you speak to your insurance agent or your company's insurance administrator before canceling any health insurance policy for any reason. The range of discounts for medical or ancillary services provided under this plan will vary depending on the type of provider and medical or ancillary service received.
